

Use when:

Cotton wool like green string algae chokes the pond. Pond is dirty / filter requires excessive cleaning / sludge builds up. Topping up with tap water (up to 10% volume). Lillies and plants looking unhealthy.

Acts against:

Blanket weed / string algae and consumes sludge to reduce pond and filter cleaning. Removes chlorine, chloramine and heavy metals in tap water. Feeds aquatic plants.

INSTRUCTIONS:

1. Calculate the ponds volume using the following calculation: Length in metres x width in metres x average depth in metres x 1000 = Litres, divide by 4.54 for gallons. For help go to www.blagdonwatergardening.co.uk.
2. If using pods in conjunction with the *Clean Pond Machine*, clean the filter as described in the product instructions.
3. Each pod doses up to 500 litres (110 gals). Add the required amount of pods into the dosing chamber of the *Clean Pond Machine*. Place into the filter box if using a different filter type or into an area of high water flow in the pond.
4. Always add the pods prior to topping up with tap water, if required.
5. The water-soluble film will rapidly dissolve to release the active ingredients into the pond.
NOTE: This will take longer when water temperature is low.
6. Repeat the dose after 2 weeks and then dose monthly or as and when required thereafter.
Cease using *Clean Pond Pods* once water temperatures drop below 10°C.
NOTE: *Clean Pond Pods* will work with a pond or filter.

HARMLESS TO FILTER AND ALL SPECIES OF POND FISH, PLANTS AND WATER USING WILDLIFE.

DANGER

Contains L(+)
Tartaric Acid

Causes serious eye damage. If medical advice is needed, have product container or label at hand. Keep out of reach of children. Wear protective gloves/protective clothing/eye protection/face protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor. Dispose of contents in accordance with local, state or national legislation. Store product in a cool, dry place out of direct sunlight. Do not allow product to freeze. Reseal immediately after use. Do not place wet hands in the pouch or allow pods to encounter water during storage. Pod size may vary but will not affect product efficiency.
